As the Security Manager, you will be joining our Security Risk Management (SRM) department and more precisely leading our Security Operations Center (SOC). The SOC team works in collaboration with all security resources and management to ensure proper planning, coordination and mitigation of security incidents, monitoring, alerting and automation of security tools.

Moreover, in this role, you will lead a distributed team of security analysts and specialists by providing technical knowledge, strategic thinking, and leadership on a variety of subjects including incidents, projects and various responsibilities as well coordinating all actions with top management and local authorities.

Responsabilities

- Develop the team's vision and the company strategy in regard to security incidents detection and response;
- Lead strategic direction and roadmap for our cyber security operations center and our analysts evolution;
- Maintain, and lead the implementation of a complete security program analyzing risks around Threat intelligence;
- Manage the team efforts in order to ensure optimal usage of resources to achieve the team's objectives and overcome difficult challenges;
- Manage a team to ensure smooth execution of Security strategy and clean roll out of projects;
- Represent the team and discuss its services and capabilities with internal stakeholders, partners within SRM and different teams;
- Create an environment build on trust, open communication, creative thinking, and cohesive team effort;
- Contribute to the team development, expertise evolution, anticipate future needs and propose training accordingly.

- Relevant experience in the IT security field with a proven track record of management function within a SOC;
- Strong leadership skills, leader within technical teams in an ever-evolving environment;
- Ability to interact with representatives from different sectors and communicate technical and business concepts to all types of audiences;
- Experience with various technologies used within a SOC environment: SIEM, SOAR, EDR, IDS, Anti-virus, firewalls.

Just a heads up: If you require a work permit, your eligibility may depend on your education and years of relevant work experience, as required by the government.

Skills and competencies show up in different forms and can be based on different experiences, that is why we strongly encourage you to apply even though you may not have all the requirements listed above.

At Ubisoft, we embrace diversity in all its forms. We're committed to fostering an inclusive and respectful work environment for all. We know the importance of providing a pleasant interview experience, therefore if you need any accommodation, please let us know if there is anything we can do to facilitate the interview process.
