The infrastructure department of our global network team is seeking a Security Network Administrator who can bring their expertise to life in our dynamic team of gaming & tech enthusiasts. If you are bold, driven and unafraid of pushing boundaries, we want you on our team.

As Network Administrator, you will be responsible for installing and maintaining IT solutions and services as well as proposing improvements and optimisations to the current infrastructure. As a senior administrator, you will also be responsible to solve complex issues brought to us by our partners

Mission

- Install, configure, and maintain network and system equipment (switches, firewalls, load balancers, proxies, custom firewalls).
 - Deploy and manage private network links and dedicated peering.
 - Monitor, troubleshoot, and optimize network infrastructure and services to ensure high availability.
 - Perform proactive network security management, including threat detection, incident response, and enforcement of security policies.
 - Conduct regular capacity planning and security audits to prevent risks and performance issues.
 - Drive automation adoption to strengthen operational efficiency, reliability, and security consistency.
 - Participate in defining and applying standards, guidelines, best practices, and metrics.
 - Evaluate and support new requirements, technical designs, and secure architecture choices.
 - Maintain updated documentation of network hardware, software, and security configurations.
 - Mentor team members, particularly new administrators, and contribute to planning secure network evolution.
-
- Demonstrated expertise in advanced network and security administration (firewalls, load balancers, proxies, VLANs, ACLs, EtherChannel, Layer 2/3 protocols), supported by extensive industry experience with the tasks outlined above.
 - Proven ability to design, implement, and maintain secure, large-scale infrastructures while proactively identifying and mitigating risks.
 - Strong proficiency in Linux environments and automation (Python, Ansible, CI/CD), with success applying these in complex operational contexts.
 - Skilled in developing innovative solutions to resolve unprecedented or high-impact technical

challenges.

- Adept at optimizing network performance and reliability through capacity planning, proactive monitoring, and process improvements.
- Recognized for leadership and mentoring, with the ability to make complex information clear and actionable across technical and non-technical audiences.

We embrace a hybrid work model helping you stay connected with your team and aligned with business priorities, while giving you the opportunity to maintain your work-life balance. Note, that some roles are fully office-based and are not eligible for hybrid work.

Just a heads up: If you require a work permit, your eligibility may depend on your education and years of relevant work experience, as required by the government.

Skills and competencies show up in different forms and can be based on different experiences, that is why we strongly encourage you to apply even though you may not have all the requirements listed above.

At Ubisoft, we embrace diversity in all its forms. We're committed to fostering an inclusive and respectful work environment for all. We know the importance of providing a pleasant interview experience, therefore if you need any accommodation, please let us know if there is anything we can do to facilitate the interview process.
