You will join the Security and Risk Management department as a Solution Security Architect (also referred to as Embeds) focused on Network Security topics. By integrating deeply with teams, you drive security from within, implementing protections, and accelerating remediations. You will contribute to the reduction of risks by embedding within the Network IT teams, while working with the rest of the organization.

Key Responsibilities

- Lead remediation of critical vulnerabilities within the assigned scope, including post-incident actions.
 - Implement security measures on behalf of network infrastructure teams
 - Roll out major security initiatives across the mandate scope.
 - Provide expert security recommendations tailored to our systems and context.
 - Build and maintain security configuration templates and hardening standards.
 - Prototype and validate new security improvements or solutions.
 - Ensure proper documentation of all implemented security controls and measures.
 - Contribute to a corpus of best-practices, knowledge bases, and guidelines to push security left and foster self-service
-
- Expertise in network security across **L2-L4**, including **routing, ACLs, VPNs, segmentation, LAN/WAN architectures** (e.g., **Cisco**), and **data center-grade firewalls and load balancers**.
 - Strong mastery of cloud network security for **AWS** and **Azure**, including **VPC/VNet design, peering, security groups/NSGs, firewalls, hybrid connectivity, and policy enforcement** (e.g., **Calico**).
 - Proficiency in **Linux** system security, including **nftables/iptables, hardening, logging**, and securing services such as **DNS, IDS, PowerDNS**, and **Suricata**.
 - Skilled in automation through **Infrastructure as Code** (e.g., **Terraform, Ansible**) and **scripting/programming** in **Python, Go**, or **Bash** for tooling and workflows.
 - Knowledge of advanced networking and security concepts such as **DNSSEC, PKI, TLS, reverse proxies, NAC solutions** (e.g., **Cisco ISE**), **802.1X**, and **device posture management**.
 - Familiarity with **cloud-native** and **container security**, including **Kubernetes networking, CNI/Calico, zero-trust architectures**, and operational practices such as **SIEM** usage and **root cause analysis**.

We embrace a hybrid work model helping you stay connected with your team and aligned with business priorities, while giving you the opportunity to maintain your work-life balance. Note, that some roles are fully office-based and are not eligible for hybrid work.

Just a heads up: If you require a work permit, your eligibility may depend on your education and years of relevant work experience, as required by the government.

Skills and competencies show up in different forms and can be based on different experiences, that is why we strongly encourage you to apply even though you may not have all the requirements listed above.

At Ubisoft, we embrace diversity in all its forms. We're committed to fostering an inclusive and respectful work environment for all. We know the importance of providing a pleasant interview experience, therefore if you need any accommodation, please let us know if there is anything we can do to facilitate the interview process.
