You will join the Security and Risk Management department as a Solution Security Architect (also referred to as Embeds) focused on Network Security topics. By integrating deeply with teams, you drive security from within, implementing protections, and accelerating remediations. You will contribute to the reduction of risks by embedding within the Network IT teams, while working with the rest of the organization.

Key Responsibilities

- Lead remediation of critical vulnerabilities within the assigned scope, including post-incident actions.
 - Implement security measures on behalf of network infrastructure teams
 - Roll out major security initiatives across the mandate scope.
 - Provide expert security recommendations tailored to our systems and context.
 - Build and maintain security configuration templates and hardening standards.
 - Prototype and validate new security improvements or solutions.
 - Ensure proper documentation of all implemented security controls and measures.
 - Contribute to a corpus of best-practices, knowledge bases, and guidelines to push security left and foster self-service
-
- Expertise in **network security design** in **AWS and Azure** environments: VPC/VNet, segmentation, application zoning (frontend / backend), peering and hybrid connectivity, Virtual WAN, Cloud WAN.
 - Strong expertise in **filtering mechanisms, firewalls, proxies, and load balancing** (L4/L7), including Network/Application Load Balancers and Web Application Firewalls.
 - Proven experience in the design and validation of **site-to-site and client VPNs**, as well as interconnections with **on-premises services**.
 - Ability to define, challenge, and validate **secure network architectures** in compliance with corporate standards and security requirements.
 - Strong capability to **support and advise internal teams** (consulting, design reviews, recommendations) with a **security-by-design** approach.
 - Experience with **Infrastructure as Code** (e.g. Terraform) and **automation of security controls**

Just a heads up: If you require a work permit, your eligibility may depend on your education and years of relevant work experience, as required by the government.

Skills and competencies show up in different forms and can be based on different experiences, that is why we strongly encourage you to apply even though you may not have all the requirements listed above.

At Ubisoft, we embrace diversity in all its forms. We're committed to fostering an inclusive and respectful work environment for all. We know the importance of providing a pleasant interview experience, therefore if you need any accommodation, please let us know if there is anything we can do to facilitate the interview process.
