As a **Build and Release Specialist** at Ubisoft Toronto, you will help design, improve, and maintain the build and deployment pipelines that support our game development teams. Working in a modern technical environment, the Build and Release Specialist plays a key role in ensuring that builds, tools, and systems are reliable, scalable, and easy for production teams to use. You will support daily development needs while helping production and project submissions run smoothly.

## What you'll do

- Maintain and evolve **build pipelines** to deliver stable and reliable builds to production teams.
- Troubleshoot **build, pipeline, and infrastructure issues**, prioritizing and escalating when needed.
- Manage and support **version control systems** such as **Perforce** and **Git** across projects.
- Provide hands-on **technical support** to multi-disciplinary development teams.
- Integrate and improve **tools and services** to meet evolving production needs.
- Coordinate **large-scale migrations and integrations**, clearly communicating impacts and timelines.
- Prepare **platform builds and packages**, including console submissions and management.
- Evaluate new **technologies and best practices** to strengthen build and release workflows.

## What you bring to the team

- Practical experience building and maintaining **CI/CD pipelines** using tools such as **GitHub Actions, GitLab CI/CD, Jenkins, or TeamCity**.
- Strong understanding of **deployment tools and artifact management**, including **Docker, Kubernetes, NuGet, or Artifactory**.
- Experience working with **cloud environments** and infrastructure.
- Solid knowledge of **version control workflows** using **Git, Perforce, or similar systems**.
- Proficiency with **scripting languages** such as **PowerShell, Bash, or batch scripting**.
- Familiarity with **C++** or other low-level languages is an asset.
- A collaborative mindset with the ability to work across diverse technical teams.
- Strong **communication skills**, attention to detail, and a proactive approach to problem-solving.

## What to send our way

- Your CV highlighting relevant skills and experiences.
- Links to projects, repositories, or examples that showcase your **build, automation, or DevOps work**.
