As an Associate Technical Director - Design at Ubisoft Montréal, you will support the technical vision and production workflows related to game systems and content configuration. You'll collaborate with multidisciplinary teams to create scalable solutions, improve workflows, and maintain reliable data structures that support large-scale content production across the Siege project.

What you'll do

- **Create** and maintain MTX templates for customization assets in development
- **Define** and document reusable data structures that support scalable content production
- **Identify** opportunities for tooling and automation that improve workflow efficiency and simplify data configuration
- **Support** the development of sustainable and scalable production practices for game systems and content workflows
- **Manage** cross-disciplinary data configuration needs that fall outside animation, audio, and graphics ownership
- **Collaborate** with teams across disciplines to support feature integration and technical configuration requirements
- **Assist** the AI team with data configuration required to deploy AI bots across game maps
- **Act** as a point of contact for shared configuration workflows and production support
- **Contribute** to knowledge sharing and alignment with Design Technical Directors across global Siege teams
- **Promote** consistent standards and collaborative problem-solving across studios

What you bring to the team

- **Experience** working with technical design workflows, data configuration, or production pipelines in game development
- **Knowledge** of customization content workflows, scalable game data structures, or technical production processes
- **Ability** to create and maintain clear technical documentation
- **Understanding** of tooling, automation, or workflow optimization practices
- **Collaboration skills** when working with multidisciplinary and international teams
- **Organization** and effective prioritization skills in a production environment
- **Problem-solving skills** with a focus on practical and scalable solutions
- **English communication skills** required to collaborate with global teams and work with technical documentation primarily available in English

What to send our way

- Your CV highlighting relevant skills and experiences
- Portfolio or project links adapted to the role
