As a Solution Security Architect at Ubisoft Montréal, you will join the Security and Risk Management Security Engineering team. You will help define and implement security controls, contribute to risk reduction initiatives, and support the deployment of security solutions across the Ubisoft group, including projects related to Anvil and Snowdrop productions.

What you'll do

- Contribute to security initiatives by participating in development activities, identifying and addressing security vulnerabilities, implementing security requirements, and deploying security solutions
- Support the deployment and long-term maintainability of **security tools** used by operational teams
- Evaluate and reduce risks affecting services and development teams by considering real-world threat scenarios
- Collaborate with **Security Engineering** leadership and enterprise security specialists to align solutions with security standards and domain requirements
- Contribute to the design, development, and deployment of **security solutions** used across Ubisoft services and products
- Support secure development practices within projects related to **Anvil** and **Snowdrop**
- Document implemented changes and security improvements
- Share knowledge and support development and operations teams on security-related topics

What you bring to the team

- Experience working with **CI/CD pipelines**, **DevOps practices**, and the integration of security tools such as **SAST**, **SCA**, or **DSA**
- Experience in **software development** and **application security**, including knowledge of **OWASP** practices
- Knowledge of **C#**, **Go**, **Python**, and/or **JavaScript**
- Understanding of **OAuth**, authentication mechanisms, **Azure OIDC**, and **AWS**
- Familiarity with **threat modeling** processes
- Knowledge of **supply chain security** and secret management solutions such as **HashiCorp Vault**
- Experience with **penetration testing** or **Capture the Flag (CTF)** activities is an asset
- Strong communication, collaboration, and knowledge-sharing skills

What to send our way

- Your CV highlighting relevant skills and experiences
- Relevant project links, GitHub repositories, or technical contributions
